WASHINGTON, D.C. - Today Congressman Charlie Wilson voted to put Americans back to work, create 3 to 4 million jobs and jumpstart our economy. The U.S. House passed the American Recovery and Reinvestment Act of 2009 with a vote of 244 to 188.

Developed with the Obama Administration, this recovery and job creation package will rebuild America, make us more globally competitive and energy independent, and transforming our economy for long-term growth; give 95 percent of American workers an immediate tax cut; and invest quickly in the economy.

"I was happy to see the American Recovery & Reinvestment Act pass the House today," Wilson said. "I believe the plan will help us reverse the current economic meltdown. Some have complained that the plan is too big; others have complained that it isn't big enough. As with all legislation, this represents a compromise and I believe we worked hard to develop a plan whose results will be felt in every community in this country. Ohio could receive billions of dollars in federal funds. That's huge, and I will do everything in my power to make sure working families and businesses in my district get their fair share of it. It is only fair that the communities that have been the most devastated by recent economic woes get the help they have needed for so long," said Wilson.

"I'm also pleased that the plan includes numerous tax credits that will directly benefit millions of Ohio's working families and businesses," Wilson added.

Some of the initial estimates for Ohio include:

- \$2,826,874 for Ohio's Medicaid program
- \$756 million in Food Stamps to help 1,209,000 Ohio families
